Welcome to the camping comforts of The Arctic Fox truck campers.

Our goal at Northwood is to provide "no nonsense construction" in a unit built strong to withstand off-road use without leaving behind the comforts of home.

The Arctic Fox Camper is the most innovative truck camper on the market today. Don't be mislead by those who claim to be on the leading edge of technology with the truck camper slide-out concept. It took Northwood to get the ball rolling and we intend to keep it rolling by continuing to provide the best and latest innovations and value for the money you spend. We understand the importance of engineering and building campers that are durable enough for extended cross-country and off-road travel.

You will be amazed at the room afforded by the expanse of the full-wall slide-out available in all models of Arctic Fox Campers.

The electric slide operates with the touch of a finger. Rack and pinion rams are driven by a gear reduction 12 Volt motor. Two rams (not 1) coupled with heavy duty rollers to carry the weight of the slide-out, move the room in and out smoothly. The slide room is supported by a full two inch header all the way around the opening. Five separate seals insure against water intrusion. The slide room is totally insulated for your comfort in changing weather.

You have your choice of four beautiful interior décor colors. Feature fabrics enhance the solid oak hardwoods and textured wall boards. The 20 mil wear surface vinyl floor covering is commercial grade. You also have the option of a removable carpet kit.

There are many other reasons for you to choose an Arctic Fox. Here are just a few:

**Sleep Better** – Full size queen deluxe inner-spring mattress

**Dry Camp longer** – Extra Large capacities: 46 gallon fresh water, 35 gallon grey water and 40 gallon waste tanks on most models.

**All Season** – Heated basement area for fresh water tank, grey and black tanks.

**Roomier** – Full wall slide, not just the dinette.

**Deluxe Accommodations** – Kenwood stereo w/CD player, Oak cabinet doors, Pre-wired for TV dish, Wired for solar panels, Phone jacks.

**Well Insulated** – A full three inches of solid tapered foam in roof. Vacuum laminated for full walk-on strength.
Seamless Siding – For structural strength and integrity. It doesn’t hurt the look either.

Deluxe Appliances – Porcelain lined water heater. Up-grade model double door 3-way refer/freezer, 20M BTU forced air furnace, High-output range w/oven.

Structural Strength – Sandwich foam laminated floors, walls, ceilings and end walls with high tensile steel reinforcement in critical areas insure strength, safety and integrity.

Upgrades All The Way – Dual 7 Gallon LP tanks, marine type outside shower, Extra large rear awning (7' X 8'), Remote control electric jacks, Roof rack & ladder, Skylights, Fan vent and much more.

Your new Arctic Fox does not require an optional luxury décor, exterior, convenience or weather package. It has it all! Simply select your favorite model, maybe a few equipment options and you are on your way to a wonderful camping experience.

Happy Camping from Northwood!

The Arctic Fox is the best selling Slide truck camper on the market.

- 7' Rear Awning
- Diamond Plate Kick Panel
- Onan Generator
- Quality Kenwood CD/Stereo
- 3" Vacubond Tapered Roof
Fox Camper Safety Tips

- Truck manufacturers state that you should not exceed the GVWR for the vehicle that carries your camper. The configuration of your truck will determine what size camper you can carry. A dual rear wheel truck is advisable for Arctic Fox campers over 10'.

- Some states allow passengers to ride in the camper but is not recommended as there are no seat belts available.

- Use Tork-Lift frame mounted camper tie downs for greatest safety.

- Adjustable air bags will help to level your vehicle, transfer rear axle weight forward for comfort and safety and are recommended for all Arctic Fox applications.

- Use mirrors that allow you to view past the camper to the rear on both sides for your safety while driving. Trucks can be purchased with extended mirror options or you may purchase mirror extensions.

- Use camper guides to help you easily load to the center of your truck for balance and safety.

- In windy, rainy, foggy, stormy or any other adverse conditions it is always best to reduce your speed.

Happy & Safe Camping!
CONSTRUCTION AND EXTERIOR FEATURES

- Hardwall with splash exterior graphics
- Laminated block foam insulation sidewalls, front, rear, bulkhead & floor
- Tapered laminated block foam insulated one-piece rubber roof walk on roof rear to nose
- Radius cornered windows w/interior fasteners tinted safety glass torque & sliders
- Recessed automotive tail lights with backup lights
