We welcome you to the Camping Comforts of Arctic Fox Truck Campers

Arctic Fox Camper

Silver Fox Edition

Ron and Sherry Nash

Model 990 * Wet Bath * Nutmeg Interior
Built to withstand off-road use without leaving behind the comforts of home, the Arctic Fox Camper is the most innovative truck camper on the market today. For years, Northwood has been the industry leader with the truck camper slide-out concept and this year is no exception! With the launch of our Silver Fox aircraft style superstructure, our Transverse Floor, and our deepest slide out yet, we plan to continue leading the industry in innovative slide out camper engineering. Like all Arctic Fox Campers, these new Foxes are durable enough for extended cross-country and off-road travel. The availability of a Full-wall slide-out in all models is a trade mark of the Arctic Fox.

We build our slide outs right, using dual rack and pinion slides (while many competitors rely on a single slide mechanism.) Heavy duty rollers carry the slide-out allowing the room to move smoothly. Five separate seals insure against water intrusion. The slide room is completely insulated for your comfort in all weather conditions. You have your choice of three beautiful interior decor colors. Feature fabrics enhance the solid oak hardwoods and textured wall boards. We use only commercial grade vinyl floor covering and you also have the option of a removable carpet kit.
Arctic Fox is a leader in full wall slide out truck camper design. We are proud to bring you a variety of big slide out camper options. Our full wall slides are up to 26” deep, (bigger than most of our competitors).

Our aluminum super structure slide out will also operate under heavier load conditions than competitors.

When you compare the specifications of our slide out with the competition, you will see why Arctic Fox continues to be an industry leader.

Our transverse floor structure offers a wider main floor area giving the Arctic Fox Camper a spacious feel that is immediately apparent upon entering the coach.

Available In These Color Palettes

- Autumn
- Emerald
- Nutmeg
Curtitian folding wall is standard with all Arctic Fox Campers.

* Monitor Panel (Holding Tanks & Batteries)
* Generator Panel (optional)

Huge Full Wall Slide with 43” x 78” Dinette (Available in Most Models)

Aluminum Floor Truss/Tank Support Design

Arctic Fox Camper Safety Tips

Adjustable air bags will help to level your vehicle transfer rear axle weight forward for comfort and safety and are recommended for all Arctic Fox applications.

For your safety while driving, use mirrors that allow you to view past the camper to the rear on both sides. Trucks can be purchased with extended mirror options or you may purchase mirror extensions.

When driving in any adverse weather condition it is always best to reduce your speed.

Truck manufacturers state that you should not exceed the GVRW for the vehicle that carries your camper. The configuration of your truck will determine what size camper your vehicle can carry. A dual rear wheel truck is advisable for Arctic Fox Campers over 10 ft.

Some states allow passengers to ride in the camper, but it is not recommended as there are no seat belts available.

After market truck bed guides can help you load to the center of your truck for balance and safety.

26 NORTHWOOD ASSOCIATES ON THE ROOF OF AN ARCTIC FOX 1150 TRUCK CAMPER!
