Form & Function: Interiors that work, beautifully!

29V Spice Interior
Welcome!
Northwood is pleased to introduce to you, The 2008 Arctic Fox.

With two dozen plans to choose from, there is an Arctic Fox to fit the needs of nearly every RV buyer.

If you're in the market for a compact travel trailer & have off-road recreation in mind, or you're looking for a spacious 5th wheel for park camping, the Fox offers a wide variety of features and options sure to satisfy your needs.

That's because The Fox was designed with the informed RV purchaser in mind.

We invite you to take a look and you'll see why Arctic Fox is the RV of choice for the experienced buyer, and why The Arctic Fox is known as ...

"Your Home Away From Home."

Features
Every Arctic Fox includes:
a quick winterization system, large tinted windows, a black tank flush system, abundant lighting placements, numerous electrical outlets, ducted heating & cooling, The Fox truly is feature rich!

Confidence
Beyond it's features, Arctic Fox has built it's reputation on quality materials and solid construction methods. Because the Fox is so durable, satisfied owners are pleased to discover how well the Arctic Fox maintains it's resale value. (If they're ever willing to turn loose of one!)

Beauty: It's more than skin deep!

At first glance, it might seem strange to include a picture of a steel I-Beam in our opening pages, but we know that our frames are gorgeous!

Everything rides on the quality of your chassis and suspension and Northwood builds the best under every Arctic Fox!

Look underneath the coach and see for yourself, your family's safety is secure in the Arctic Fox. You'll feel the difference that a quality chassis, larger axles, bigger brakes and all wheel shocks will make as you travel down the road, or when you get adventurous and take your Fox off-road. The Fox will go where competitors fear to tread!

"We welcome you to the Camping Comforts and Residential Amenities of Arctic Fox 5th Wheels and Travel Trailers"
Just like home, the forced air ducted heating and cooling systems in your Arctic Fox provide fast winter warm ups and quick summer cool down. The heating system also circulated warm air to our ‘4-Season’ fully enclosed, insulated holding tanks. That fact makes the Arctic Fox a big seller in cold northern climates. All foxes come standard with R-18 insulation in the roof and R-7 insulation in the walls. Thermal pane windows are also available and all Foxes come standard with 80/20 tinted windows. These windows keep you cool, provide privacy, and protect your furnishings from harmful UV rays. All Arctic Foxes are equipped with a Charge Wizard battery management system to maximize your battery performance. In addition, all LPG tanks are connected through an auto change-over regulator to switch the supply of propane to a full tank when the first one is emptied.

More smart features and options include: Quick Recovery DSI Gas/Electric Water Heater, Solar Panel, Generator, Pantry Storage Rack, Pull-Out Kitchen Faucet-Sprayer, Flat Panel TV, DVD Entertainment System with 5.1 Surround Sound...
You’ll be assured of a restful night’s sleep in your Arctic Fox. All mattresses are deluxe queen size and some models offer a twin bed or bunk bed option. Some bedroom plans feature built in vanities with large drawers and cabinets and designer Wilson Art laminate tops. Additional features and options include large mirrored closets, swivel slide out TV mounts, bed slide outs with opening side windows, and many residential features providing all the comforts of home.

Outside the Fox, you will find sidewall drip rails with oversized drain spouts to project water away from the coach. There are multiple patio lighting placements and you can add an auto scanning satellite receiver and many other convenient options.
The Arctic Fox is Built Right! Whether it's materials like our one piece heavy gauge roof membrane, our one piece crown treated filon outer wall, our WBP marine grade plywood decking, our thick wall aluminum framing, or our construction grade dimensional lumber, we use only top quality materials in the Arctic Fox, the Silver Fox and the Special Edition.

We assemble our coaches using the best proven construction methods and processes too. Within our laminated walls are fully welded aluminum frames (not spot welded) with solid block foam insulation. Our custom cabinet production uses face frame construction & real plywood shelving (not chipboard).

Our Northwood roof truss system bonds exterior plywood decking to the trusses as a unified structure that is amazingly strong yet light weight. On smaller Arctic Fox models, the diamond plate front rockguard and rear bumper wrap are tough, attractive and built to last. Larger models include fiberglass front and rear end caps. The Arctic Fox is quality materials and construction from start to finish!
**Slide Rooms**

Super slide models come with a jackknife sofa or optional hide-a-bed and a dinette that converts into an additional sleeping area or you can choose a free standing 4 chair dinette. Our Slide rooms travel on electric driven heavy duty rack and pinion rams and have 4 individual seals that maintain a seal when open, closed, and even while in transition. The Fox is Smart!

**Safety**

All foxes are equipped with Large retractable safety entrance handles and retractable non-skid double and triple steps for safe, easy access. And the Fox also has one of the highest highway safety ratings in the industry today.
These special features and options are only available in certain models.
These special features and options are only available in certain models.
We design and build our own chassis to guarantee quality. We use only top quality Rustoleum finish to prevent rust. We also double prime our welds for added protection.

Camber Welds
Special welds are applied along the top of the main rails to create camber. Our cambered frame has greater load carrying capabilities than others. Our chassis functions in the same way as a pre-stressed structural beam. The Arctic Fox won't sag like the competitors models under full load weight. (Even after many years of service). Extra considerations such as these insure that your Arctic Fox will maintain its value and that Northwood coaches will continue to be a top performer among competitive RV manufacturers.

A Solid Foundation

Structural Steel
All Northwood 5th Wheels & Travel Trailers are built with structural steel main rails of I-beam or C-channel. The full length main rails and full width cross members insure a solid structure for easier towing and a quality feeling structure under foot. Chassis also include Z cross members for additional strength.

All Northwood coaches include dual battery racks that are welded directly to the frame. Travel trailers include a large capacity, dual LPG tank rack that is conveniently located at the trailer tongue for quick access.

Cast Iron Gas Manifold
We nest our LP gas manifold line within the chassis structure to protect it from damage. We use larger dimension pipe to improve gas flow to all appliances. We also use brass fittings to attach appliance feed lines to the manifold. All of these considerations make our gas supply system extremely durable and problem free. LP lines are protected with vinyl sleeves and sealed with silicone when they pass thru the floor.

A True 4-Season Coach

Fully Insulated Compartment

The Arctic Fox is a true 4-Season Coach. Our fully insulated holding tank area circulates warm air around the suspended tanks providing the best protection from freezing. The tanks are large and will hold up to 76 gallons of fresh water, 75 gallons of gray water storage, and up to 46 gallons in the black storage tank. The black holding tank also comes with an internal sanitation system for easy maintenance.

4 Star Rating

RV Consumer Group has given the Arctic Fox consistent high marks of Value, Reliability and Highway Control. The Arctic Fox is engineered for Safer Travel! Because our chassis are so solid, you will feel the difference when towing your Fox down the highway.

4 Season All Weather Coach
