Northwood is pleased to introduce you to this year's Arctic Fox. With nearly 20 floorplans to choose from, there is an Arctic Fox to fit the needs of nearly every RV buyer. If you're in the market for a compact travel trailer & have off-road recreation in mind, or you're looking for a spacious 5th wheel for park camping, the Fox offers a wide variety of features and options sure to satisfy your needs. That's because the Fox was designed with the informed RV purchaser in mind.

We invite you to take a look and you'll see why Arctic Fox is the RV of choice for the experienced buyer, and why the Arctic Fox is known as "Your Home Away From Home."

Ron and Sherry Nash

Comfortable
You'll be assured of a restful night's sleep in your Arctic Fox. All standard beds feature deluxe pillow top queen size mattresses and twin beds are available as an option in the 26X, 23-5A and the 24-5N models.
Some bedroom plans feature built in vanities with large drawers and cabinets and designer laminate tops. Additional features include large mirrored closets, flat panel LCD TVs, bed slide outs feature opening side windows, and many residential features providing all the comforts of home.

Beyond it's features, Arctic Fox has built it's reputation on quality materials and solid construction methods. Because the Fox is so durable, satisfied owners are pleased to discover how well the Arctic Fox maintains it's resale value ... if you're ever willing to turn loose of one!

Super slide models come with a jackknife sofa or optional hide-a-bed and a booth dinette that converts into an additional sleeping area or you can choose a free standing 4 chair dinette. Our Slide rooms travel on electric driven heavy duty rack and pinion rams and have 4 individual seals that maintain a seal when open, closed, and even while in transition. The Fox is Smart!
All Arctic Fox models feature corona treated Filon fiberglass exterior siding that looks great and is durable and easy to maintain. The diamond plate front rock guard and rear bumper wrap are tough, attractive and built to last. All Silver Fox models feature front and rear molded fiberglass caps. The Arctic Fox utilizes quality materials and construction from start to finish!

Outside the Fox, you will find sidewall drip rails with oversized drain spouts to project water away from the coach. There are multiple exterior lighting placements and you can add an auto scanning satellite receiver and many other convenient options.

Our main frame structural components are made of thick wall aluminum tubing. The joints are connected with continuous bead welds unlike many competitors who use tack or spot welds in assembling their frames. Our continuous welds are stronger and more durable.

We also add solid core anchor blocking in the frame perimeter. The solid blocking provides substantial anchor medium for securing screw threads. Combining heavy gauge welded aluminum with solid blocking makes a light, rigid and strong frame.

After positioning the urethane, a structural sub-layer of wood paneling is added. Our multi-layer composite wall system provides substantial strength to the coach. All layers are hot/pressure laminated, bonding them together as a single structural unit. The multi-layer exterior skin with steel bonderizer backing forms a very strong surface for anchoring fixtures.

The insulated wall section is then placed on the wood and urethane layered outer skin. Next, the hot melt coated inner finish wall panels are added. The wall assembly is now ready to move on to the pressure roller which will fuse the layers into a single bonded unit.

All Foxes are equipped with large retractable safety entrance handles and retractable non-skid double or triple steps for safe, easy access. According to RV Consumer Group, the Fox also has one of the highest highway safety ratings in the industry and the improved visibility of LED running lights and tail lights now makes our Arctic Foxes even safer on the road.
RV Consumer Group has given the Arctic Fox consistent high marks of Value, Reliability and Highway Control. The Arctic Fox is engineered for Safer Travel! Because our chassis are so solid, you will feel the difference when towing your Fox down the highway.

At first glance, it might seem strange to include a picture of a steel I-Beam in our brochure, but we know that our chassis' are gorgeous! Everything rides on the quality of your chassis and suspension and Northwood builds the best under every Arctic Fox! Look underneath the coach and see for yourself, your family's safety is secure in the Arctic Fox. You'll feel the difference that a quality chassis, larger axles, bigger brakes and all wheel shocks will make as you travel down the road or when you get adventurous and take your Fox off-road.

Heavy Gauge Structural Steel I-Beam Main Rail

Four Star Rating: RV Consumer Group has given the Arctic Fox consistent high marks of Value, Reliability and Highway Control. The Arctic Fox is engineered for Safer Travel! Because our chassis are so solid, you will feel the difference when towing your Fox down the highway.

is much more than Skin Deep!

26Z Sienna Rust

22H Majestic Mink

25P Spring Mist
Just like home, the forced air ducted heating and cooling systems in your Arctic Fox provide fast winter warm-up and quick summer cool down. The heating system also circulates warm air to our ‘4-Season’ fully enclosed & insulated holding tanks. That fact makes the Arctic Fox a big seller in cold northern climates. All Foxes come standard with R-18 insulation in the roof and R-7 insulation in the walls. Thermal pane windows are also available and all Foxes come standard with 80/20 tinted windows. These windows keep you cool, provide privacy, and protect your furnishings from harmful UV rays. All this insulation also makes Arctic Fox the perfect choice for hot southern climates.
All Arctic Foxes are equipped with a Charge Wizard battery management system to maximize your battery performance. In addition, all LPG tanks are connected through an auto change-over regulator to switch the supply of propane to a full tank when the first one is emptied.

Construction

The Arctic Fox is Built Right! Whether it’s materials like our one piece heavy gauge rubber roof membrane, our corona treated fiblon fiberglass exterior siding, our engineered plywood decking, our thick aluminum wall framing, or our construction grade dimensional lumber, we use only top quality materials in all Arctic Fox models. We assemble our coaches using the best proven construction methods and processes. Our laminated walls use fully welded aluminum frames (not spot welded) with solid block foam insulation.

Our custom cabinet production uses solid wood face frame construction for added strength. Northwood never cuts corners in their plumbing installation either. You’ll find full 1½ inch drain lines, freeze resistant supply lines, and even a quick semi-automatic winterization system. Our Northwood roof truss system bonds exterior plywood decking to the trusses as a unified structure that is amazingly strong yet light weight. On smaller Arctic Fox models, the diamond plate front rockguard and rear bumper wrap are tough, attractive and built to last. Silver Fox models include molded fiberglass front and rear end caps. The Arctic Fox is quality materials and construction from start to finish!
More Travel Trailers... with More Features!

Features

Every Arctic Fox includes a quick winterization system, all wheel brakes, black tank flush system, abundant lighting placements, numerous electrical outlets, and ducted heating & cooling in every model.

Fifth Wheels... with Residential Styling

29-5T
Bathroom Vanity
Arctic Fox 5th-Wheels and Travel Trailers offer a spacious galley work area for food preparation. All coaches feature an extra large range with a 22" oven and range hood with overhead light and exhaust fan. Every galley features a microwave oven and a double door gas/electric refrigerator. Sinks are brushed nickel deep double basin models with either a hi-rise faucet or a single lever model with sprayer. Rich Wilson Art counters are standard, and a free-standing 4 chair dinette is a popular option available in slideout models. We provide ample storage in overhead cabinets, under counter cabinets, shelves, and drawers. Add the BBQ grill option and you’ll feel like you’ve never left home!

Whether you’re hunting, camping, working or adventuring, you’ll find every floor plan is innovative, practical and comfortable.

**A Solid Foundation**

**Structural Steel**

All Northwood 5th Wheels & Travel Trailers are built with structural steel main rails of I-beam or C-channel. The full length main rails and full width cross members insure a solid structure for easier towing and a quality feeling structure under foot. Each chassis also include Z cross members for additional strength.

We design and build our own chassis to guarantee quality and excellent driveability. We use only top quality finishes to prevent rust, and also double prime our welds for added protection.

---

**Camber Welds & Dual Battery Rack**

Special welds are applied along the main rails to create camber. Our cambered frame has greater load carrying capabilities than others. Our chassis functions in the same way as a pre-stressed structural beam. The Arctic Fox won't sag like the competitors models under full load weight - even after many years of service.

---

**Cast Iron Gas Manifolds**

All Northwood coaches include dual battery racks that are welded directly to the frame. Travel trailers include a large capacity, dual LPG tank rack that is conveniently located at the trailer tongue for quick access.

We nest our LP gas manifold line within the chassis structure to protect it from damage. We use large dimension pipe to improve gas flow to all appliances. We also use brass fittings to attach appliance feed lines to the manifold. All of these considerations make our gas supply system extremely durable and problem free. LP appliance feed lines are protected with vinyl sleeves and sealed with silicone when they pass thru the floor.

---

**...and Many More Standard Features**

- Large Capacity Exterior Access Storage Compartments with...
  - One Inch Thick Insulated/Locking Exterior Storage Compartment Doors
  - Metal Latches, Metal Catches and Metal Pulls on Doors
  - Top Quality Automotive Weather Seals Around All Storage Doors

  - Insulated Slideout Floors
  - "Arctic Fox" Entry Floor Mat
  - Insulated Slideout Floors
  - Exterior TV Mount & Hookups
The Arctic Fox is a true 4-Season Coach. Our fully insulated holding tank area circulates warm air around the suspended tanks providing the best protection from freezing. The tanks are large and will hold up to 76 gallons of fresh water capacity, 75 gallons of gray water storage, and up to 44 gallons in the black storage tank. The black holding tank comes with an internal sani-flush system for easy maintenance. The flush system is simple to use and makes maintenance of the waste holding tank quick and easy. All Arctic Foxes are designed with your convenience in mind and this feature is standard in all Arctic Fox Fifth Wheel and Travel Trailers!

Photos in this brochure contain optional and standard items, and decor items. See dealer for specific information regarding standard equipment and optional features. Photos and drawings are representative. Check with your authorized dealer for up-to-date information. Northwood continually upgrades and improves its products and reserves the right to change specifications without notice.
