"Home is where you park it"

"The Fox has been our Home for the last three months in all kinds of weather and all kinds of roads and has performed magnificently."
John & Linda Ross, 99c owners

‘Quality You Can See’
For years, Northwood has been the industry leader in slide out truck campers and this year is no exception! Like all Arctic Fox Campers, these new Foxes are durable enough for extended cross-country and off-road travel! Our transverse floor structure offers a wider main floor giving a spacious feel that is immediately apparent upon entering the coach. Check out the new features such as the comfortable and convenient Dream Dinette, with no table legs to negotiate around, and the new larger dinette window to enhance your view of the outdoors while dining or relaxing. Arctic Fox is the leader in slide out truck camper design.

Many manufacturers are building aluminum frame truck campers nowadays, but aluminum frames are not all the same. We are proud of the quality materials we use and the construction methods we employ to build America’s best selling full wall slide out truck camper.

There’s no doubt that our Arctic Fox truck campers are attractive, but what really sets us apart from the competition is how beautifully they’re constructed. From our heavy gauge aluminum with continuous welded joints and solid fill anchor blocking, to our bonded full wall on roof (that will support 31 employees), the Arctic Fox Truck Camper is truly a thing of beauty. Once you’ve owned an Arctic Fox, you’ll never be satisfied with less. That’s why we say... “Beauty is more than skin deep!”
Northwood is pleased to introduce you to the Arctic Fox Truck Camper. With eight plans to choose from, there is an Arctic Fox to fit the needs of nearly every camper buyer. You can purchase your Fox Camper with confidence because Northwood builds more slide out truck campers than any other manufacturer! Arctic Fox offers a wide variety of features and options sure to satisfy your truck camper needs. That's because The Fox was designed with the informed camper purchaser in mind. We invite you to take a closer look and you'll see why Arctic Fox is the truck camper of choice for the experienced buyer.

When you compare the specifications of our slide out with the competition, you will see why Arctic Fox continues to be the industry leader. Our full wall slides are up to 26” deep, and our aluminum super structure slide out operates under heavier load conditions than competitors. We build our slide outs right, using dual ram rack and pinion slide mechanisms. Many competitors rely on a single slide mechanism. The dual rams carry the slide-out room smoothly even under full load weights. Five separate seals ensure against water intrusion. The slide room is completely insulated for your comfort in all weather conditions. We will continue to lead the industry in innovative slide out camper engineering.

Feature fabrics enhance the High Valley Maple finish hardwoods and textured wall boards. You have your choice of a number of beautiful interior decor colors. We use only commercial grade vinyl floor covering and you also have the option of a removable carpet kit. (Carpet kit not available in the 865 and 992 model.)

Northwood Manufacturing reserves the right to modify options, change feature availabilities and plan configurations at any time. Please note that weights are approximate and for estimation purposes only. Specifications and weights are subject to change without notice.

Camper Safety Tips

For your safety while driving, use mirrors that allow you to view past the camper to the rear on both sides. Trucks can be purchased with extended mirror options or you may purchase mirror extensions. Truck manufacturers state that you should not exceed the GVWR for the vehicle that carries your camper. The configuration of your truck will determine what size camper you can carry. A dual rear wheel truck is advisable for Arctic Fox Campers over 10 ft. Adjustable air bags will help to level your vehicle transfer rear axle weight forward for comfort and safety and are recommended for all Arctic Fox applications.

Some states allow passengers to ride in the camper, but it is not recommended as there are no seat belts available.

When driving in any adverse weather condition it is always best to reduce your speed.

The pickup should be outfitted with a durable rubber mat liner to reduce shifting while traveling. The mat will also protect the truck bed and camper from scratching while loading and unloading.

www.torklift.com
Use TORKLIFT frame mounted camper tie downs for greatest safety.
111 Reasons To Buy An Arctic Fox

Construction
Aluminum Superstructure
Welded Aluminum Framing (0.060" - 125")

Thank you!

Thank you for taking a moment to check out our Northwood products. Our highest priority is to offer you the best combination of quality and value in an RV and we are confident you will appreciate and thoroughly enjoy your Northwood RV purchase for many years to come.

Ron and Sherry Nash
Aluminum Superstructure & Solid Core Blocking

Aluminum Superstructure with Solid Core Anchor Blocking
Anchor blocking gives substantial strength at main connection points.

Full Walk On Roof - 31 Employees On Board!

Now that's an ABSOLUTE FULL walk-on roof!
When Northwood advertises a “Full Walk-On Roof” for our slide out truck campers, you not only can walk everywhere on the roof, but you could also invite a couple dozen of your friends to join you.

We tested the strength of our 932 full-wall slide model by loading the roof with 31 of our camper line employees (a good testimonial for our camper jack's tool).

Structural Aluminum Basement Floor Frame

1-1/4" Plywood

Tubular Aluminum Truss Basement Floor Frame
Big holding tanks require a "Big" floor structure.
That's the Arctic Fox floor!
Thick wall aluminum basement floor joists support our holding tanks under the basement of every Arctic Fox Truck Camper.

Solid Wood Cabinetry

4 Season All Weather Camper

The foundation walls of a Northwood Truck Camper are the thickest in the industry!
We use 1-1/4" thick plywood for the strongest basement wall you will find anywhere! A structure is only as good as its foundation and we build on the best.

Heated Holding Tank Area
Our fully enclosed, insulated and heated holding tank area circulates air around the suspended tanks providing the best protection from freezing. All our dump valves are also enclosed and heated to ensure smooth operation, even in cold northern climates.
