Storage, storage, storage—everywhere you look there is storage. No short cuts here—whether it’s the wardrobe closets in the bedroom, or the abundant cabinets, drawers and pantry in the main cabin, the Wolf Creek 850 is designed to accommodate your camping needs and unlike most light duty campers the 850 comes standard equipped with a gas/electric fridge…and it’s even upgradeable!

Meal prep and clean-up are a snap in the 850 kitchen. The large basin and the high profile faucet will accommodate large pans. The well lit counter offers plenty of work space and an optional counter extension is available. The cook top is larger than the competition by providing a third burner. Cooking options like microwave and conventional ovens are also available in the Wolf Creek 850 to accompany the standard equipped high output 3 burner cook top.

The lighter, narrower footprint of the 816 Wolf Creek means you will travel more efficiently, but it’s smart space planning allows plenty of room and provides all the amenities you expect from a well appointed truck camper. Functional counter space is situated between the high profile faucet with large basin and the 3 burner cook top and an optional microwave oven is available in the 816. The Wolf Creek is equipped with a number of 110v power outlets and one is conveniently located in the kitchen for your coffee pot, toaster, or slow cooker.
No compromises here. The wet bath in the Wolf Creek features durable, molded components to make sure that the water goes nowhere but directly to the grey tank. The Wolf Creek wet baths are built tough, heavy gauge and very durable. All wet baths include a shower, toilet and a ceiling vent plus a toiletry cabinet and a rack to dry your towels or wet clothing.

Just close the privacy curtain to escape into your 816 bedroom. All the necessities are included. You'll find an inner spring mattress with a designer bedspread to keep you comfortable. There is a night stand for your book and glasses as well as adjustable reading lights and electrical outlets for your clock radio. Whether in the wardrobe or on the storage shelf, your belongings will be as snug as you are.

The Wolf Creek is very versatile should you need to accommodate additional guests for the night. The optional overhead combination bunk/cabinet provides cabinet storage when not being used as a fold-down bunk. The dinette also converts to a sleeper when the adjustable table is lowered and the cushions are repositioned. And for those considering the 850 model, an optional roll-over sofa is available in place of the dinette.
**Wolf Creek**

* Welded .060 Thick Wall Aluminum Framing
* 40" x 78" Horseshoe Dinette
* Full Fiberglass Shower Enclosure
* Dual Wardrobes in Cab Over
* 3 Burner High Output Range Top

- OPTIONAL ROLL-OVER SOFA
- OPTIONAL BUNK

*Also available in a short box version with optional Generator

Roam Where You Dare

LIGHT DUTY Series
Our Impressions: 2012 Wolf Creek 850

Truck Camper Magazine Review
August 2011

Spending two weeks in the 850 gave us an unusual opportunity to experience a new brand and product.

For starters, the 2012 Wolf Creek 850 is right up our alley, hard-side, non-slide, fully self contained, and brimming with practical and weight-saving design choices. In short, we love campers like this because they are everything we need for the kind of long-distance, go-whewhere truck camping we enjoy. Even more important, they show a willingness of manufacturers to embrace the increasing importance of lower weight truck campers and design new campers accordingly.

We really appreciated the generous holding tanks for a camper this size. Thirty gallons of fresh water? That’s amazing...The grey and black tanks were also ample at twenty-two gallons and twenty gallons respectfully. When we turned the vent fan on, it surprised us with just how much air it pulled...

...they put a very tall bubble window in the bathroom that allowed me, at 6’3”, to see almost completely around the camper...it was really fun to be able to look around and see what was going on outside the camper...

We were mixed on our impressions of the dinette. We liked how big it was, but wondered if it needed to be quite this wide. Northwood explained that it was wide to allow for an adult sized sleeping area. It certainly was. The dinette was also comfortable and worked well during our two weeks in the camper. I appreciated the long cushion that allowed me to stretch out. We found an outlet under the dinette in the perfect place to plug in our laptops. Nice touch.

Kitchen storage and counter space were plentiful for a truck camper this size. We also liked the round sink and tall faucet. Having a large storage drawer under the cooktop instead of an oven was another practical cost and weight saving decision. As we get more experienced with cooking in a truck camper, we use camper ovens more and more. That said, we didn’t use a camper oven at all except to store pots and pans until the past couple of years. Could we live without the oven? We sure could. Did we appreciate the additional storage of the drawer where the oven would have been? You bet.

The three cubic foot refrigerator was smaller than we’ve used to, but fit our normal round of groceries with ease. What we lost in space, we gained in a lighter weight refrigerator. We can’t ask the manufacturers to make their campers lighter without also being open to选项 like a smaller refrigerator. This is a compromise I could live with as we never found the space in the refrigerator to be lacking. Sure, it’s nice to have separate freezer and refrigerator sections, but this was perfect for what we needed.

On the driver’s side overcab entry was a standard cabinet with an open storage spot just underneath it. We used this for overflow items and found it to be very useful and practical. It also saved a little more weight by not having a door. We really liked it.

We also appreciated the storage under the overcab step-up. We put our sneakers in there when we were wearing sandals, or vice versa.

As always, little things make the biggest differences. For example, the overcab reading lights in the Wolf Creek are outstanding. Unlike many other overcab reading lights, they are not too bright or too hot.

Some overcab reading lights make you wonder when the men in black will arrive to ask you exactly where you were on October 18th, 1972, and what you were doing there. We also appreciated that these lights were easy to move. I liked them pointed away, as pictured, to give a more indirect and ambient light.

On the passenger’s side of the overcab, the Wolf Creek had what I would call a night stand. The front of the night stand had an opening and storage area where I placed my sweatshirts and jeans. Just like at home, I put some reading material and my iPod touch (alarm clock) on the nightstand.

When we were plugged in, I really appreciated the outlet that was also with the nightstand. Personally, I prefer this nightstand to the traditional overcab-nose storage. The driver’s side of the overcab nose had the traditional storage cabinet and Angela was so jealous of my nightstand. Did I offer to switch sides? No way, Jose!

For someone looking for an aluminum framed, hard-side, non-slide truck camper that will work with some half-tones and nearly every three-quarter ton truck, the 2012 Wolf Creek 850 deserves to be on your short list. This is an impressive camper from a company that understands truck campers and cares deeply about quality control. Congratulations Northwood on your new Wolf Creek truck camper brand and an impressive first camper with the 2012 Wolf Creek 850.

A Solid Foundation-Thick Basement Walls and Aluminum Trusses.
The foundation walls in a Northwood Truck Camper are the thickest in the industry!

We use 1-1/4" thick plywood for the strongest basement wall you will find anywhere! A structure is only as good as its foundation and we build on the best.

Tubular Aluminum Truss Basement Floor Frame
Big holding tanks require a ‘big’ floor structure... That’s the Wolf Creek floor!
Thick wall aluminum basement floor joists support our holding tanks under the basement of every Wolf Creek Truck Camper.

One Piece Laminate Walls
Our aluminum wall frames are constructed of .060 thick aluminum tubing and all joints are welded full width, not spot welded like much of the competition.

One Piece Continuous Fiberglass
The outer skin of our laminated wall is a single sheet of tough, corona treated fiberglass. Corona treating insures the urethane is able to properly accept the hot melt adhesives. A single piece of fiberglass eliminates seams that can leak & it’s stronger too.

Steel Bonderizers
We add steel bonderized strips inside the wall at all mounting points. The bonderizers provide a steel anchor point for any fixtures that are mounted to the walls.

Solid Core Anchor Blocking
We also add solid core anchor blocking in the frame perimeter. The solid blocking provides a substantial anchor medium for securing screw threads.

Solid Wood Face Frame Cabinetry
We build our own cabinets and every cabinet is built to the best quality specifications. By building our own cabinets, we can guarantee that they will be made right and are built to last!

Top Quality Materials
All NORTHWOOD cabinets are made with residential quality material and methods. Because we use screws they hold up better under travel/road conditions.

Face Frame Construction
We use the same construction techniques used in quality residential cabinetry. We assemble hardwood styles with screws on a face frame machine to ensure strong, durable cabinets.
