Absolute Northwood

"Where Quality is Everyone's Responsibility"

When Northwood advertises a "Full Walk-On Roof" for our slide out truck campers, you not only can walk everywhere on the roof, but you could also invite a couple dozen of your friends to join you!

We tested the strength of our 992 full-wall slide model by loading the roof with 32 of our camper line employees (a good testimonial for our camper jacks too!).

4 Season All Weather Camper

Full Walk On Roof - 32 Employees On Board!

Now that’s an ABSOLUTE FULL walk-on roof!

When Northwood advertises a "Full Walk-On Roof" for our slide out truck campers, you not only can walk everywhere on the roof, but you could also invite a couple dozen of your friends to join you!

We tested the strength of our 992 full-wall slide model by loading the roof with 32 of our camper line employees (a good testimonial for our camper jacks too!).

Solid Wood Cabinetry

...that is mounted to the Walls and the Ceiling

Our Commitment to
Quality Strength Durability

By using solid wood face frame construction and then integrating the cabinet with the structure of the ceiling and walls, our coaches and our cabinets are both made stronger.

Heated Holding Tank Area

Our fully enclosed, insulated and heated holding tank area circulates air around the suspended tanks providing the best protection from freezing. All our dump valves are also enclosed and heated to ensure smooth operation, even in cold northern climates.
The **FOX LANDING** offers a large entry platform, convenient fold away stairs and an intermediate step for easy access. The stairway can be installed to the left or right of the landing and the platform folds up out of the way for travel or when hitching your boat or trailer. Check it out!

- 4 Equal Height Steps
- Mid Step (Between Bumper & Threshold)
- Wide Bumper
- Left or Right Hand Accessible
- Steps Fold Up in Seconds
- Single Pin Locks Into Position
- ...Exclusively in Northwood Campers!!!

**CAMPER SAFETY TIPS:** For your safety while driving, use mirrors that allow you to view past the camper to the rear on both sides. Trucks can be purchased with extended mirror options or you may purchase mirror extensions. Truck manufacturers state that you should not exceed the GVWR for the vehicle that carries your camper. The configuration of your truck will determine what size camper your vehicle can carry. A dual rear wheel truck is advisable for Arctic Fox campers. Adjustable air bags will help to level your vehicle, transfer rear axle weight forward for comfort and safety, and are recommended for all Arctic Fox applications. Some states allow passengers to ride in the camper, but it is not recommended as there are no seat belts available. When driving in any adverse weather condition it is always best to reduce your speed. The pickup should be outfitted with a durable rubber mat liner to reduce shifting while traveling. The mat will also protect the truck bed and camper from scratching while loading and unloading.

**More Popular Options To Consider**

With the Overhead Bunk option in the dinette, you can add an extra sleeping area for a child. The bunk quickly and conveniently folds up and away against the ceiling of the slideout when not in use. You may also want to consider adding a Full Wall Wardrobe in the bedroom or a Roll-Over Lounge instead of the standard dinette. (Available in most models).

**TORKLIFT**

Use **TORKLIFT** frame mounted camper tie downs for greatest safety.

When Northwood advertises a "Full Walk-On Roof" for our slide out truck campers, you not only can walk everywhere on the roof, but you could invite a couple dozen of your friends to join you!!

We tested the strength of our AF 992 full-wall slide model by loading the roof with 32 of our camper line employees. (A good testimonial for our camper jacks, too!).

When we say ‘FULL WALK ON ROOF’ we mean it!

Don’t try this with your camper, especially if it’s a competitors model! Our employees are in, on and around campers all day long. Please, be safe!
We purchased the Arctic Fox 990 as our first camper, and we couldn't be happier with this choice. Our initial trip was 9,000 miles in two months. We were perfectly comfortable with the accommodations. It has everything we need in a small, agile package. The quality of construction is evident. We tested the "four seasons" functionality with freezing weather in Yellowstone and simmering heat in Texas. We're on the road again now, touring the Southwest before bringing it home to Alaska. We look forward to many more years of exploring in this truck camper.

Northwood Team: The quality and attention to detail in production of your Arctic Fox line of campers is great! Your efforts invested in time and energy result in making sure we can do the thing we enjoy the most! Sincerely, Dave & Patty Heath

Rodger said first, if you enjoy camping then you should have an Arctic Fox four season camper. If you have an Arctic Fox pickup camper then the Fox Landing is a must! It makes all the difference getting in and out. Rodger spends a lot of time in his shop, you never know what he is going to come up with next.

Several days ago I saw something stored in our basement compartment, after looking in the bag I wondered, "What is this"? In just a couple minutes look what it becomes! A Fox Landing Hand Rail...

Northwood Team: It may be the only AF Camper that has lived it's entire life in the Arctic... A very proper home for our Fox. We bought the unit new, it's still performing just fine, everything runs & still looks new, yet it's been kept outside all those years. It seems very expensive at the time we bought it, but looking back, it was worth the every penny. Aside of the odd little thing here and there, we've had no problems with it.

It is sitting on our 1998 1 ton 4x4 Dodge dually Cummins Diesel and they look like they were meant for each other. We also added a 75W solar panel on the roof to keep the battery charged.

Well done, Arctic Fox people and Thank You!

Mike & Ali Wagner,
Arctic Fox

Shimmering Sands Interior

www.northwoodmfg.com
Over the past 2 years I have spent 182 nights in an Arctic Fox Truck camper. I started with a 990 and switched it a year ago for a 992. It’s amazing what you will discover by living in your own product. It’s the little things you discover. As a result of my 'campouts', we’ve added a bigger dinette window, the dream dinette, a light in the dump valve area, clear glass in the rear entry door and many more improvements.

Skiing is my hobby, my passion and my job. And when I started looking for a truck camper that would work in the extreme cold of the mountains in Canada’s west, the Arctic Fox quickly became the obvious choice. My wife, dog and I spend practically every weekend on the road - finding powder stashes at resorts and in the backcountry. Waking up to a fresh blanket of snow on the camper, rested and ready to go is a pretty sweet way of starting the day.

This is like our cabin on wheels. Many friends have tagged along for a weekend and by the time we’re dropping them back off in the city, they’re totally converted. What we most love about the camper is the incredible insulation that keeps us cozy even when a -20 blizzard is raging outside.

Meanwhile, we’re chilling out, making a delicious dinner or playing scrabble or watching a movie. I’m telling you, ski buming has never been so luxurious!
