With 3 beautiful Interiors

To Choose From

850 Early Autumn
After extensive research, I bought the 2013 Wolf Creek 850 for use in Alaska. It has all the amenities my family of 3 needs and more. We traveled through Canada and into Alaska in April 2013, temperatures were below freezing and the camper kept us dry and warm. It was very surprising to me how much storage space was available and with the 5 CUF fridge we could carry many days of food without having to resupply. The four season capability is a must up in Alaska and I am extremely happy with my 850.

Quality Features

Large Capacity Tanks & Amenities
For Extended Camping Capability
Steel Reinforced, Embedded,
Bolt-through Tie Down Brackets
Quick Recovery 6 Gal.
DSI Gas/Elect. Water Heater
Thick Wear Surface
Commercial Grade Flooring
Led Interior/exterior Utility Lighting
Fiberglass Shower With Skylight
Deep Tint Safety Glass

Flagstone Mosaic Interior

Skiing at Alpental Ski Area
Snoqualmie Pass, WA

We have had our 2013 Wolf Creek 850 Truck Camper since October 2012 and have been enjoying it completely! We chose to get the Wolf Creek camper because my family loves to camp yet we don’t love tents. My daughters and I love having nice warm beds and bathroom in the camper. My husband chose the Wolf Creek 850 and wanted it to be winterized so that we can take it up to our local ski area in Washington where we spend many weekends skiing and camping in the snow. Something we would never consider in a tent.

Currently, we are on a year long road trip with the family in the Wolf Creek. My husband, myself and my two daughters (8 & 11) left Seattle, WA at the end of August and headed North, through Vancouver, BC and headed all the way up to Hyder, AK. Then made our way down through the Canadian Rockies and back into the US through Montana, South Dakota and through the Great Lakes Region. After Michigan we went North again and toured Montreal and Quebec City. After getting sprinkled with a bit of snow in Quebec and getting shut out of closed RV parks, we decided to head South. We went through Maine, stopped in Salem, MA to experience the Halloween festivities and explore Boston and now we are in Gettysburg, PA and are planning to continue heading South. We will spend Thanksgiving in Virginia and make our way to Florida for December before we head to the Rockies for ski season and then head West in the Spring and back home next Summer.

All the best,

Kathy & Andrew Gorohoff
Absolute Northwood
“Where Quality is Everyone’s Responsibility”

One Piece Laminated Walls
Our aluminum wall frames are constructed of up to 1/8” thick aluminum tubing and all joints are welded full width, not spot welded like much of the competition.

One Piece Continuous Fiberglass
The outer skin of our laminated wall is a single sheet of tough, corona treated fiberglass. Corona treating ensures the polyurethane is able to properly accept the hot melt adhesives. A single piece of fiberglass eliminates seams that can leak & it’s stronger too.

Steel Bonderizers
We add steel bonderizer strips inside the wall at all mounting points. The bonderizers provide a steel anchor point for any fixtures that are mounted to the walls.

Solid Core Anchor Blocking
We add solid core anchor blocking in the frame perimeter. The solid blocking provides a substantial anchor medium for securing screws.

Solid Wood Face Frame Cabinetry
We build our own cabinets, and every cabinet is built to the best quality specifications. By building our own cabinets, we can guarantee that they will be made right and are built to last!

Top Quality Materials
All NORTHWOOD cabinets are made with residential quality material and methods. Because we use screws, they hold up better under travel/road conditions.

By integrating the cabinet with the structure of the ceiling and walls, our coaches and our cabinets are both made stronger.

Face Frame Construction
We use the same construction techniques used in quality residential cabinetry. We assemble hardwood styles with screws on a face frame machine to ensure strong, durable cabinets. The result: Beautiful, quality cabinetry and the best built truck camper!

A Solid Foundation: Thick Basement Walls & Aluminum Trusses.
Thick Wall Tubular Aluminum Floor Frame
Really Big holding tanks require a ‘Really Big’ floor structure…
That’s The Wolf Creek Floor Structure! Thick wall aluminum basement floor joists support our holding tanks under the basement of every Wolf Creek Truck Camper.
Continuous One Piece Fiberglass Cabover / Bulkhead No seams that can leak!

Northwood Seat Step
What a Great Idea!
Makes getting into the cabover a breeze.
Doubles as an additional seat.
~~~~~~~~~~
Easy to attach and remove.
Simply hang it on the bulkhead wall.
Use as a cabover step or as a seat.
A terrific option to add to your Wolf Creek!

“The Ultimate Back Porch” FOX LANDING

The new FOX LANDING offers a large entry platform, convenient fold away stairs and intermediate step for easy access. The stairway can be installed to the left or right of the landing, and the platform folds up, out of the way, for travel or when hitching your boat or trailer. Check it out!

Manufactured Exclusively for NORTHWOOD
* 4 Equal Height Steps
* Mid Step (Between Bumper & Threshold)
* New Wider Bumper
* Left or Right Hand Accessible
* Glow Step Treads
* Steps Fold Up in Seconds
* Single Pin Locks Into Position
Features & Options

Standard Construction Features

CAMPER SAFETY TIPS:
For your safety while driving, use mirrors that allow you to view past the camper to the rear on both sides. Trucks can be purchased with extended mirror options or you may purchase mirror extensions. Truck manufacturers state that you should not exceed the GWR for the vehicle that carries your camper.

The configuration of your truck will determine what size camper your vehicle can carry. A dual rear wheel truck is advisable for Wolf Creek campers. Adjustable air bags will help to level your vehicle, transfer rear axle weight forward for comfort and safety, and are recommended for all Wolf Creek applications. Some states allow passengers to ride in the camper, but it is not recommended as there are no seat belts available. When driving in any adverse weather condition it is always best to reduce your speed. The pickup should be outfitted with a durable rubber mat inside to reduce shifting while traveling. The mat will also protect the truck bed and camper from scratching while loading and unloading.
